THE

FOUNDRY TRADE JOURNAL

(with which is incorporated THE IRON AND STEEL TRADES JOURNAL)

ESTABLISHED 1902

INDEX TO VOLUME LVI

January to June, 1937

Head Office:
49, Wellington Street, London, W.C.2

Tech

Index to Volume LVI

SUBJECT INDEX

A

Aachen Foundry Convention, Annual, 86.
Abrasion of Metals, Experiments on the, 388.
Adsorption and Searching, Wetting, 168.
Air-Compressor Control, 102.
Air-flow Measurements, 317.
Airless Shot Blasting, 13.
Alloying Cupola Grey Cast Iron, 527.
Aluminium Alloys, Chill Casting of, 459.
Aluminium Alloys, Corrosion-Resisting Cast, 253.
Aluminium Alloys, Notes on the Structure and Characteristics of, 523.
Aluminium Consumption, 249.
Aluminium Statue of 1893, 228.
American Foundry Industry in 1936, and Its Prospects for 1937, 80.
American Foundrymen's Association, New Officers, 430.
American Scrap and Pig Position, 397.
American Vitreous Enamelling Practice, 378.
Annealing, Short-Cycle, 126.
Apprentices are Rated in America, How, 445.
Association Technique de Fonderie, Election of Officers, 324.

B

Bamfords, Limited, 479.
Bath-Making from Cupola to "Bakery," Layman Looks at, 63.
Belgian Foundry Industry, Recent Progress in, 72.
Beryllium, Alloys of Tin with Germanium and, 249.
British Industries Fair, 133.
British Iron and Steel Federation, Annual Dinner, 169.
British Iron and Steel Federation, New Offices, 195.
British Non-Ferrous Metals Research Association, Annual Meeting and Luncheon, 522.
Brown & Sons (Hudd.), Limited, New Foundry of David, 97.
Brown-Firth Research Laboratories, 350, 389.
Bureau of Analysed Samples, Annual Report, 171.

C

Canadian Copper and Nickel Production, 5.
Cast Iron, Alloying Cupola Grey, 527.
Cast Iron and Its Application in Engineering, 153, 173.
Cast-Iron Borings to Profitable Account, Turning, 268.
Cast-Iron Hollow-Ware Industry, 150.
Cast Iron, Influence of Elements on, 159.
Cast-Iron Metallurgy, Principles of, 258.
Casting of Metals, Physical Factors in the, 505.
Cement as a Binder for Moulding Sands, 405.
Census of Production, 1935, Fifth, 227, 391.
Chaplets and Core Nails, Tin-Free, 461.
Chill Casting of Aluminium Alloys, 459.
Clay Washer, New, 296.
Coal-Dust in Moulding Sands, Further Developments in, 192.
Coke Size in Melting Cast Iron, Effect of, 467.
Colloidal Graphite, as a Die-Casting Lubricant, 232.
"Colourdex" Planning System, 6.
Combustion Appliance Makers' Association, Annual Meeting, 258.
Composite Casting, Economising in Metal by, 460.
Compression Curve for Foundry Moulds, Ideal, 249.
Compression on the Properties of Moulding Materials, Influence of, 253.
Conveyor System, Compact, 443.
Copper and its Alloys, Antiquity of, 249.
Copper Market Runs Wild, 208.
Copper Situation, Difficult, 420.
Copper?, Who Will Control, 117.
"Corecoat," 443.
Core Drying by Modern Methods, Mould and, 142, 162, 231.
Core-Making, Recent Developments in Rapid, 215.
Core Nails, Tin-Free Chaplets and, 461.
Correspondence:—
Costing Report, 478.
Expansion of Sand, 438.
Foundries on the North-East Coast, 132
How Draughtsmen could Help, 2.
Randupson Process, 103.
Recruitment Problem, 420, 458, 478, 522.
Soda Ash and Furnace Linings, 344.
"Speedy" Moisture Tester, 458.
Vitreous Enamelling in Germany, 103.
Corrosion-Resisting Cast Aluminium Alloys, 253.
Corrosion-Resisting High-Silicon Iron Alloys, 255.
Costing with Reference to Vitreous Enamelling, Elements of, 196, 276.
Costs in a Grey Iron Foundry, Recommendations concerning the Establishment of, 465, 511.
Coulabilté and Life, 246.
Crankshafts of Grey Iron, 461.
Crofts (Engineers), Limited, Jubilee Celebrations, 194.
Cupola Operation, Some Considerations of, 113, 139,
Cupola Practice, 327.
Czecho-Slovakian Foundry Industry, 67.

D

Degreasing Prior to Vitreous Enamelling, Metal, 119, 202.
Designing Engineers, Foundry Technique as an Introduction to the Education of, 254.
Desulphurisation in the Blast Furnace, 189.
Die-Casting Lubricant, Colloidal Graphite as a, 232.
Dimensional Tolerances of Castings (with Particular Reference to Malleable Cast Iron), 23, 118, 395.
District Foundry Reports:—
Birmingham, 57.
East Midlands, 58.
Glasgow and S.-W. Scotland, 60.
Lancashire Area, 60.
London, 57.
N.-E. Coast, 59.
Sheffield, 58.
South Wales, 60.
District Presidents:—
Dewar, T. Nimmo, 112
Drying Enamel Ware, 14.

E

Elektron and Hydronalium, Cast Alloys of, 253.
Elektron Metal Castings, from the Standpoint of Material, Design of, 459.
Engineering Evolution, Shipbuilding and, 106.
Equipment and Supplies, Foundry, 48.
"Eros," 228.
Estimating for the Foundry, 28.

F

Facings for Cast Iron and Their Effects on Vitreous Enamelling, Mould, 449.
Factories Bill, 144.
Ferro-Chromiums, Standard, 394.
Flow of Metals, 364.
Fluxes, Their Application and Action in the Casting of Aluminium, Foundry, 459.
Firebrick, Novel Cupola, 296.
Foundry Industry Month by Month, 61.
Foundry Problems, 463.
Foundry Research, Recent Developments in, 54.
Foundry Trades' Equipment and Supplies Association, Annual Meeting, 226.
Freezing of Cast Iron, 335.
French Foundry Industry, 73.
Furnace Design, 220
Furnace Walls, Temperature Gradient, 151, 168.

G

Gaseous Impurities in Aluminium, Problem of the Elimination of, 509.
Geared Motor Unit, New A.C., 160.
German Foundry Industry, 76, 317.
German Foundrymen's Technical Association, Programme of Annual Meeting, 310.
German Ironfounders' Association, Papers Presented to Annual Meeting, 459.
Germanium and Beryllium, Alloys of Tin with, 249.
Graphite Structure of Grey Cast Iron and its Modification, 229, 250.
Grey Iron Foundry Industry, 43.
Ground Coat Enamels, a *Résumé* of Some Studies on Sheet Steel, 374.
Growth of Cast Iron, 278.
Gunmetals, Specification for Two Leaded, 107, 208, 395.

H

Hardening Power of Cast Iron, 525.
Heat-Resisting Muffle Equipment, 274.
Heat-Treatment of Steel Castings, 213, 237, 248.
High-Duty Alloy Cast Iron, 265.
High-Duty Cast Iron, Development of, 45.
High-frequency Electric Furnaces, Experiments with, 254.
High-Quality Steels, Casting, 254.
High-Silicon Iron Alloys, Corrosion Resisting, 253.
His Majesty amongst the Foundries, 385.
Hydraulic Cleaning of Castings, 397.
Hydrogen in Steel, 236.
Hydronalium, Cast Alloys of Elektron and, 253.

I

Impact Strength and Notched Sensitiveness of Cast Iron, 255.
Ingot Mould Castings, Development in the Production of, 3, 25, 116, 530.
Ingot-Mould Life, 308.
Ingot Moulds for Steel Ingots, Failure of, 392.
Institute of British Foundrymen:—
Annual Banquet, 503.
Annual Conference at Derby, Programme of, 306.
Annual General Meeting, 491.
Annual Report, 491.
Birmingham, Coventry and West Midlands Branch, Annual Dinner, 103.
Birmingham, Coventry and West Midlands Branch, Annual Meeting, 286.
Costing Report, Correspondence on, 478.
Costing Sub-Committee's Report, 465, 511.
Cricket, Match, 438.
Derby Conference Fund, 286, 458.
East Anglian Section, Annual Dinner, 115.
East Anglian Section, Annual Meeting, 226.
East Anglian Section, Visit to Suffolk Iron Foundry (1920), Limited, 458.
East Midlands Branch, Annual Dinner, 212.
East Midlands Branch, Annual Meeting, 307.
Edward Williams Lecture, Third, 505.
Election of New Members, 96, 356, 522.
Lancashire Branch, Annual Dinner, 152.
Lancashire Branch, Annual Meeting, 325.
London Branch, Annual Meeting, 326.

670.5 v. 56

London Foundrymen's Visit to Belgium, 2, 20, 112, 186, 246.
Presidential Address, 499.
Scottish Branch, Annual Meeting, 226.
Scottish Branch, Visit to G. & J. Weir, Limited, 458.
Sheffield, Branch, Annual Dinner, 186.
Sheffield Branch, Annual Meeting, 326.
South African Branch, Inaugural Meeting, 371.
Wales and Monmouth Branch, Annual Meeting, 247.
West Riding of Yorkshire Branch, Annual Dinner, 102.
West Riding of Yorkshire Branch, Annual Meeting, 344.
West Riding of Yorkshire Branch. Visit to Peglers, Limited, 318.
Work in 1936, 39.
Works Visited at Annual Conference, 479.
Institute of Metals, Annual General Meeting, 118.
International Association for Testing Materials, 132, 160, 228, 345.
International Foundry Congress at Düsseldorf, Abstracts of Papers, 252.
International Foundry Congress in Paris, 432, 463, 534.
Iron and Steel Castings in Green Sand, Manufacture of, 329, 404.
Iron Castings for Steelworks, Production of Some, 409.
Iron and Steel Institute, Annual Dinner, 367.
Iron and Steel Institute, Annual Meeting, 232, 365.
Iron-Nickel Alloys, 174.
Italian Foundry Industry, 74.

L

Leaders:—
American Opinion, 521.
Automobile Development, 207.
British and German Foundry Production Compared, 305.
British Research Work, 131.
Can Prices be Kept under Control?, 131.
Cast Crankshafts, 263.
Commendable Scheme, 19.
Coming Events, 383.
Current Selling Prices, 305.
Derby Conference, 419, 477.
Engineer and the Foundry, 95.
Enhanced Metal Prices and the Foundry, 167.
Example of South Wales, 225.
Export Trade, 95.
Factories Bill, 149.
Field for High-Quality Irons, 111.
Foremen, 521.
Foundry and the Building Industry, 247.
Gates and Risers, 285.
International Association for Testing Materials, 343.
Introducing Those Dots, 419.
Limited Company, Public and Private, 185.
Long Live Their Majesties!, 383.
Materials Testing Congress, 225.
Metallurgical Qualifications, 323, 343.
More Statistics, 247.
New Materials in Service Applications, 1.
New Phase of Waste Utilisation, 457.
New Year's Gift to Industry, 1.
Next Session of the Foundry School, 401.
Night Watchman, 263.
"Odd Shillings and Pence," 19.
Official and Otherwise, 477.
Problem in Nomenclature, 401.
Review of the Foundry Industry in 1936, 37.
Shape of Things to Come, 167.
Spring Meeting, 363.
Statistical Position of the Foundry Industry, 185.
Technical Co-operation, 207.
Travel and Education, 323.
Turn of the Tide, 285.
Value of Practical Experience, 437, 457.
Vocational Education, 111.
Welding Cast Iron, 363
When Should the Red Light Appear? 437.
Ley's Malleable Castings Company, Limited, Works of, 480.
Life, Coulabilité and, 246.
Light Castings, Industry, 66.
Lighting, New Era in Foundry, 403.
Loughborough College, 490.

M

Machine-Moulded Castings, Some Problems Involving the Accuracy of, 319.
Magnet, Powerful Hand, 328.
Magnetic Separator, Self-Cleaning Shute, 171.
Malleable Cast Iron Industry, 49.
Malleable Iron Castings in Germany, Present Position in the Manufacture of, 256.
Manganese on Nitrogen-Hardening Cast Iron, Some Experiments on the Influence of Silicon, Phosphorus and, 353.
Mechanical Aids for Increasing Foundry Production, 287.
Mechanical Drying in Vitreous Enamelling, 199.
Mechanisation, Foundry, 209, 233.
Melting of Steel and Cast Iron in the Light of Present Metallurgical Knowledge, 461.
Metal Spraying, 240.
Metallurgical Institutes, Co-operation Between, 208.
Metals, New Phase in, 388.
Micro-Analytic Research Methods for Foundry Products, 253.
Mill Room Practice, 124, 376.
Models, Importance of, 444.
Morris, Herbert, Limited, Works of, 483.
Mould and Core Drying by Modern Methods, 142, 162, 231.
Moulders, Practical Notes for, 291.
Moulding Sand, Its Preparation and Properties, Synthetic, 460.
Moulding Sand Mixtures, Investigation of, 460.
Moulding Test, Novelty and a, 292

N

Nickel Demands Still Growing, 170.
Nickel in Non-Ferrous Alloy Castings, Use of, 513, 528.
Nickel Industry, 50.
Ni-Tensyl, Production and Properties of, 104.
Non-Ferrous Alloys, Casting Properties of, 459.
Non-Ferrous Foundry Industry, 66.
Non-Ferrous Foundry Problems, 431.
Non-Ferrous Foundry, Trends in, 470.
Non-Ferrous Metals in 1936, 64.
Non-Ferrous Problems, More, 316.
Non-Ferrous Scrap Supplies More Plentiful, 264.
Non-Metallic Inclusions in Steel, 334.
Nomograms in a Pipe Foundry, 440.
Notched Bar Bent Tests, 189.

O

Oil Cores, Testing of, 252, 368, 386.
Oil-Fired Rotary Furnace, Small, 426.
Oil-Sands for Cores, Recent Developments in Testing, 85.

P

Patterns and Their Relation to Moulding Problems, 8, 24.
Patterns on Plate and Plaster, Mounting, 421.
Phosphorus and Manganese on Nitrogen-Hardening Cast Iron, Some Experiments on the Influence of, 353.
Physical Factors in the Casting of Metals, 505.
Pig-iron, 347.
Pig-Iron Industry, 47.
Pig-iron, Synthetic, 228.
Planning System, New, 6.
Plaster, Mounting Patterns on Plate and, 421.
Polish Foundry Industry, 78.
Prime Mover Reconditioning, 264.
"Pyruma" Fire Cement Gun, 300.

Q

Qualcast, Limited, Works of, 485.

R

Radiography and X-Ray Diffraction Methods, Symposium on, 402.
Rand, Foundry Trade on the, 77.
Railway Steel Castings in Canada, Quantity Production of, 137, 157, 175, 190.
Ramming Density of Sand, Factors Affecting the, 439.
Rapping Plates, 425.
Refractory Materials, Rammed, 21.
Refractory Materials, Recent Improvements in, 187.
Refractory Materials, Testing, 370.
Refractories Industry, Recent Developments in, 56.
Research in Steel and Malleable Iron Foundries, Supervision and, 459.
Rotary Furnace, Small Oil-Fired, 426.
Runners and Risers for:—
Large Non-ferrous Castings, 177.
Cast Iron, 257.
Grey Iron Castings, 269.
Small Non-ferrous Castings, 293.
Steel Castings, 311.

S

Sandblasting, Notes on, 373.
Sands, Testing Foundry, 406, 423, 463
Scandinavia, Foundry Industry in, 71.
Scrap Market in 1936, Foundry, 46.
Scrap Specifications and Prices, 442.
Scrap Supplies, Iron and Steel, 222.
Scientific Instruments, British, 226.
Searching, Wetting, Adsorption and, 168.
Sectional Sensitivity of Cast Iron, 256.
Selling Practice, Foundry, 90, 358.
Shipbuilding and Engineering Evolution, 106.
Sheet-Steel Ground Coat Enamels, A *Résumé* of Some Studies on, 374.
Shock-Resisting Cast Iron, Manufacture in the Electric Furnace of, 20.
Silica Refractories, 318.
Silicon, Phosphorus and Manganese on Nitrogen-Hardening Cast Iron, Some Experiments on the Influence of, 353.
South African Foundry Industry, 82.
South African Tender Regulations, New, 62.
Special Cast Irons, 136.
Spectroscopic Analysis, 319.
Spelter's Big Rise, 2.
Spelter's Wonderful Rise, 162.
Spun-Iron Pipes, Mass Production of, 134.
Stanton Ironworks Company, Limited, Works of, 134, 487.
Steel at High Temperatures, Behaviour of, 193.
Steel Castings, 141, 217.
Steel Castings, Detrimental Factors Affecting, 89.
Steel Castings, Heat-Treatment of, 213, 237, 248.
Steel Castings in Green Sand, Manufacture of Iron and, 329, 404.
Steel-Foundry Industry, 44.
Steel Furnaces, Small, 278.
Superheating of Molten Cast Iron, Present Position of the, 461.
Supervision and Research in Steel and Malleable-Iron Foundries, 459.
Synthetic Moulding Sand, the Preparation and Properties of, 460.

T

Temperature Control in Vitreous Enamelling, Importance of, 446.
Testing Moulding Sands, Standardisation of, 252.
Testing, Joint Committee on Materials and Their, 324.
Time Control in the Manufacture of Repetitive Castings, 297, 313, 338.
Tin Mining in Cornwall, 140.
Tin with Germanium and Beryllium, Alloys of, 249.
Transverse Strength of Steel and Malleable-Iron Castings, 460.

U

U.S.S.R., Foundry Plant and the, 81.

V

Venting Ingot Mould Cores, 132.

Vitreous Enamelling:—
American Vitreous Enamelling Practice, 378.
Costing with Reference to Vitreous Enamelling, Elements of 196, 276.
Degreasing Prior to Vitreous Enamelling, 119, 202,
Drying Enamel Ware, 14.
Drying in Vitreous Enamelling, Mechanical, 199.
Ground Coat Enamels, A *Résumé* of Some Studies on Sheet Steel, 374.
Mill Room Practice, 124, 376.
Mould Facings for Cast Iron and Their Effects upon Vitreous Enamel, 448.
Muffle Equipment, Heat-Resisting, 274.
Sandblasting, Notes on, 373.
Shot-Blasting, Airless, 13.
Temperature Control in Vitreous Enamelling, Importance of, 446.
Vitreous Enamelling in Germany, 11.

W

Wages, Foundry, 166.
Warrington Light Castings Company, New Foundry Opened, 438.
Welding Set, Lightweight, 364.
Wetting, Adsorption and Searching, 168.
Winding Engines for Canada, Double-Drum, 247.

X

X-Ray Diffraction Methods, Symposium on Radiography and, 402.
X-Ray Examination of Macrostructures and Crystal Structure for the Foundryman, Importance of, 252.
